Below you can see a short description of user interface, controls and their functions. Homepage Homepage is divided into the following parts: the chessboard – on the chessboard you can see randomly chosen live game the games offer list – on the right from the chessboard, there is the list of games which the players join or to which they can also publish their own game offer by using the button Create game control buttons PLAY NOW – after clicking this button, a game from the games offer list is randomly chosen. In case there is no game offer available, the system creates and publishes the game offer for the user. Invite a friend – this serves for inviting friends via e-mail or social networks. It is possible to choose between standard variant or chess 960 (Fischer random chess), whether the game will be timed and what the tempo will be, color of the pieces and whether the game will be rated or not (rated game influences the rating of the user. Please note, that rated games can be played only by registered users. After setting the parameters by clicking the button Create game a menu with unique link to the game will appear, and the first person to visit this link will play the game against you. Create game – once the game parameters are chosen (these are the same as in Invite a friend) the game offer will be published in games offer list and other users of the page will be able to accept the challenge by clicking the corresponding game offer. Play against computer – in case you do not want to play against human opponent, you have the option to play chess against computer. In addition to the settings described earlier (e.g. piece color, game clocks etc.) there is one more setting which allows you to choose from 8 predefined levels of AI strength (1 being the easiest, 8 the hardest). announcement area (or the event ticker) – above the control buttons, there is a stripe in which various information (e.g. challenges from other users, draw offers etc.) is displayed to the user. The chess game The page with the chess game itself is divided similarly: the chessboard with the game the block with game info (game clock, captured pieces, chat, scoresheet etc.) buttons with in-game commands Resign - by clicking this button you resign your game Draw - with this button you can offer your opponent a draw, accept a draw offer from your opponent or claim a draw (e.g. on threefold repetition rule) Cancel - the game can be cancelled if both players did not make their move yet Undo – here you can ask your opponent to take back your move More time – adds 10 seconds to your opponent’s clock Hint - when playing against computer, you can ask for a hint announcement area (or the event ticker) – above the buttons with in-game commands, various information is displayed to the user (e.g. draw offer etc.). All important functions are free and do not require registration. Registration is free and brings advantages such as the possibility to earn rating points, to save the games in user’s profile or advanced appearance settings. (Free Internet Correspondence Games Server) FIGCS is a fast-growing organization, player community and an international correspondence chess server. Here you can play chess online for free in rated class tournaments, two players matches, advanced chess and a unique correspondence chess world championship in a big knockout tournament. The winner will play current world champion in a 12 games match. We also organize special events, thematic chess, big chess, chess 960, poker texas holdem heads up tournaments, some with money prizes. Check the waiting lists. At last on FIGCS, you can play Go (围棋, 囲碁, Cǒ wáiy, Gǒ) tournaments and world championship. Even if computers are now able to beat the very best human players from China & South Korea, its complexity still makes it one of the most interesting board games. Play this fascinating game at FIGCS. You can read the complete interview in the forum. Although many say that it seems quite impossible to beat such a correspondence chess champion in a 12 games match nowadays, you'll probably find some tips in the previous answers by former champions & finalists. Always playing the best move according to the strongest chess engines may not be the solution. Ideas from the famous "Art of war" by Sun Tzu still can be used in this modern chess era, and maybe in other games as well like Go & poker holdem, now all dominated by machines. After his win in the Go world championship final match, Yen-Wei shared his analysis on the games and his views around the world of Go (Weiqi, Baduk) and particularly computer Go in the forum. Freestyle chess... Dear chessfriends, the very best centaur (human/machine) teams produced a bunch of great games more, and the winner of the 4th FIGCS chess freestyle cup is Alvin Alcala, congratulations to him! Thanks to all players who participated.Play games on your mobile phone... FIGCS applications for Android are now available to download. Install it from Google Play Store, then you'll be able to play chess online, Go (weiqi) & Poker Holdem on your phone. Playing online games including chess, Go, and poker hold'em is easier than ever from the comfort of your mobile phone or tablet. So whether you've got an iPhone, Google Phone, Huawei or Samsung device, all you need to do is connect to the world wide web and enjoy the benefits of a modern touch interface for a better gaming experience. And with specialist games providers and casinos using a mobile-first approach, it's only going to get better! You can also find specific informations about gaming websites according to the country. In example, certain websites detail UK or Indian casinos sorted according various criteria. Other useful websites will provide you more informations on all online alternatives, listing both mobile and desktop versions, either focused mainly on the British market, the Swedish one or any other. It will also tell you if it is possible to use either Bitcoin or an e-wallet like Paypal, Neteller, Skrill, Paysafe, Epay, Netpay & so on, but surely most support a wide variety of currencies. Chess, poker & casino games... Online gaming isn't all about chess, which is considered itself as a chancy game according to the country, there are also casino games such as Blackjack and slot machines, thus you can play games for free or for money. In such online casinos, it is possible to play games for free or for money. All of these games are played at a long-term advantage for the house, however just like in some casino games such as Spanish 21 and Blackjack, the player makes decisions so the house edge may be reduced to about 0.5%, even without using card counting. There are many tactics and strategies for casual players. Many websites will help you to make the best of these online games, each country has its own guides, from scandinavia to japan. Many casinos require to get an account, however it is often possible to play without any registration. Casino guides will allow you to read a bit more on strategies and how to find the best of casino bonuses that can give you extra money and free spins. Gamblers from the United Kingdom in particular can find the latest released casinos very easily. Undoubtly we will see a growing number of new online casino sites with UK license next year. It is much more difficult to find pertinent information when not limiting your searches to a particular country, so if you need more good stuff on any casino online wherever in the world, you can have a look at one of these links, you will probably find something there. Finally, gambling is nowadays a very social thing, and in some cases a short cut to get rich. Read more at www.sveacasino.se how to take advantage of the best offers for online gambling.Correspondence chess & blitz apps... Finally, this oldschool chess website now has Facebook apps to play blitz and rapid chess games, added to the Android applications for correspondence chess, Go (baduk) & poker. Unfortunately, still no app for iPhones but this could be a next step. You'll find all links inside as soon as you're registered and connected, or you can just enter as guest. Another next step could be to offer a fully free Go server playable through a Facebook app as well, just wait and see.AlphaZero masters Go, chess & shogi... Even if the conditions of the first chess match AlphaZero vs. Stockfish were not really fair to compare the efficiency of both engines, it is no doubt that a new step has been made in artificial intelligence this year. AlphaZero (and its incredibly fast hardware) was able to master chess, shogi & Go in a few hours, beat the most famous human masters and already taught us with new strategies and views in chess openings & joseki at Go (weiqi). Will Google Deepmind envisage to make its so-called A.I. master Poker Holdem next? Will probably have an answer within a few months. However, it seems that we're not so close to see an artificial consciousness that could be compared to the human one, that is probably our very last privilege. Meanwhile, let's play! Questions answers :Is it a good time to buy bitcoin? Hi, what do you think about bitcoin these times? From 50k, just went down to about 35k, good time to buy it or better forget this idea according to you? Or maybe ethereum or any ...Why bitcoin rate decreased? Hi there. Does anyone know why bitcoin value decreased by about 35% this last week? Is Elon Musk really responsible for this because of 1 tweet only?? (people can't use bitcoin ...Why covid does not disappear? Does anyone know why this covid is still around and how long it will ...Welcome to our newest member : Pom Pam Feel free to link to this page to get FIGCS referer backlinks.
